

EIDOLON

The Workspace That Remembers Everything

Pre-Seed Investment Opportunity • 2026

Modern Work is Broken

Knowledge workers use 15+ disconnected tools daily.

Context is lost between apps. Decisions vanish into chat threads.

Files scatter across drives. Every project starts from scratch.

68%

of the workday is
spent switching context

\$1.8T

lost annually to
workplace inefficiency

Average worker
toggles between apps

1,200

times per day

One Intelligent Workspace

Eidolon is an AI-native environment where projects, conversations, files, decisions, and workflows live together in one continuous context. Nothing is lost. Everything connects.

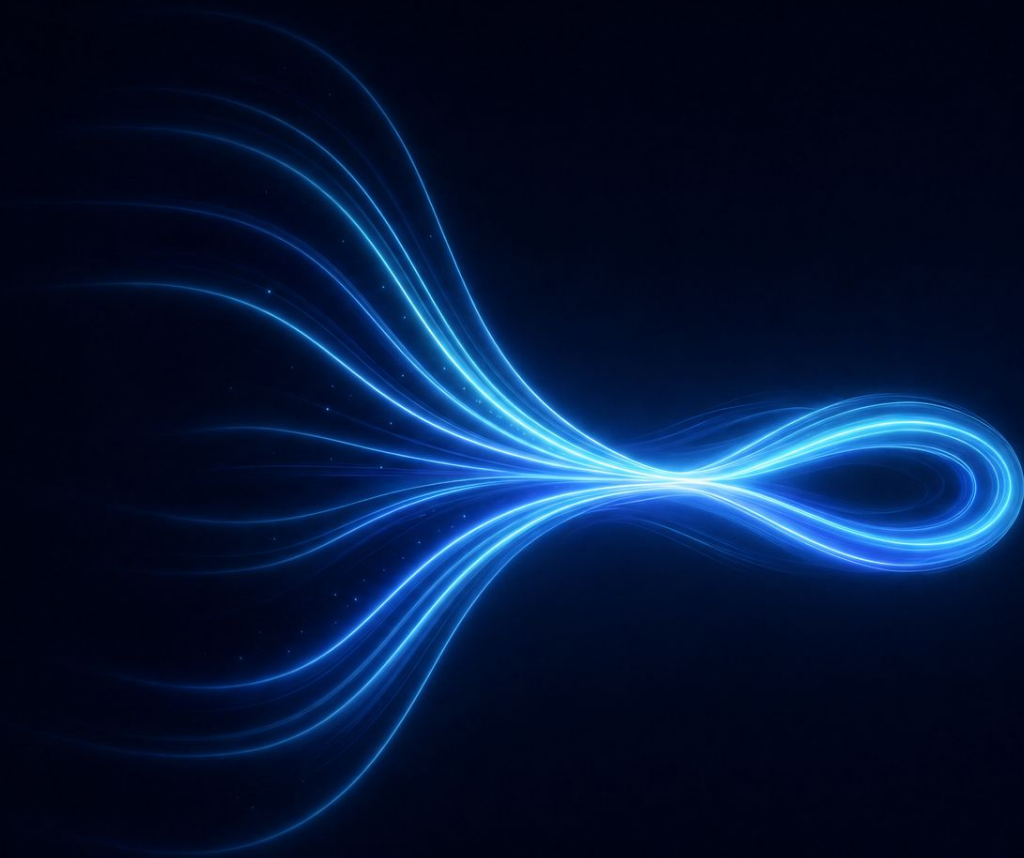

- **Contextual Memory —**
Your workspace remembers every decision, file, and conversation

- **Unified Environment —**
Chat, docs, files, tasks, and tools in one place

- **AI-Native Intelligence —**
Built from the ground up with AI at the core, not bolted on

The Timing is Perfect

01

Foundation models have reached the capability threshold for true contextual understanding

02

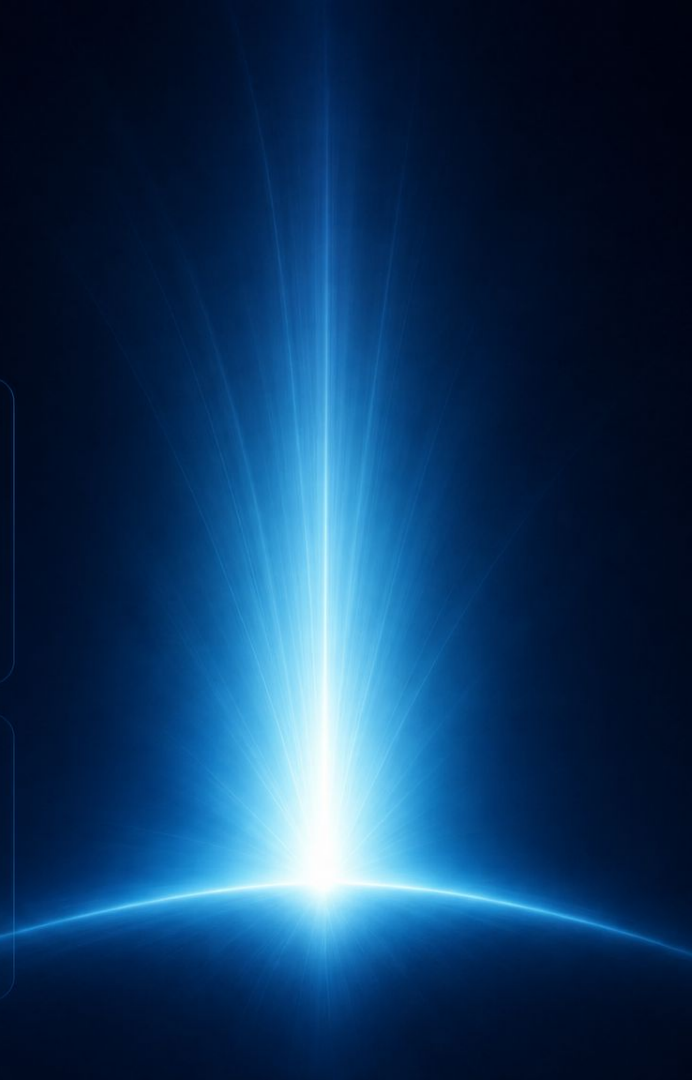

Remote and hybrid work has made tool fragmentation painful and visible

03

The \$500B+ productivity software market is ripe for platform-level disruption

04

Users are actively seeking fewer, smarter tools — not more features

A Massive, Growing Market

Starting with creators, founders, and knowledge workers.
Expanding to teams and enterprise.

The AI-Native Workspace

Persistent Context — Projects maintain full history and reasoning across sessions

Adaptive Workspace — The environment reshapes around your workflow

Cross-Modal Intelligence — Text, voice, visuals, code, and data unified

Living Documents — Files that update, connect, and evolve with your work

Not another app. A new way to work.

One Intelligent Workspace

Eidolon is an AI-native environment where projects, conversations, files, decisions, and workflows live together in one continuous context. Nothing is lost. Everything connects.

- **Contextual Memory** — Your workspace remembers every decision, file, and conversation
- **Unified Environment** — Chat, docs, files, tasks, and tools in one place
- **AI-Native Intelligence** — Built from the ground up with AI at the core, not bolted on

Built to Scale

Freemium

Free

Core AI chat
with limits

Pro

\$24/month

Full AI workspace
with unlimited context

Teams

\$18/user/month

Shared workspace
with collaborative memory

Enterprise

Custom

Private deployment, SSO,
advanced integrations

REVENUE DRIVERS

- High-retention subscription SaaS
- Platform fees from future ecosystem (plugins, integrations, templates)
- Usage-based AI compute tier for power users

Why Us

- Deep expertise at the intersection of AI, product design, and developer tools
- Firsthand experience with the pain of fragmented workflows
- Technical founders who ship fast and think in systems
- Obsessed with craft, detail, and user experience

*We're not building another productivity app.
We're building the workspace layer that
should have existed from day one.*

The Path Forward

Q3 2026

Private alpha with
200 creators and
founders

Q1 2027

Pro tier launch,
monetization begins

2028

Enterprise tier,
API platform,
ecosystem expansion

Q4 2026

Public beta launch,
waitlist conversion

Q2 2027

Teams features,
collaborative
workspace

Pre-Seed Round

RAISING:

\$2.5M

USE OF FUNDS:

Product development, founding team, private alpha

TARGET:

18 months of runway to product-market fit

INVESTOR VALUE:

Ground-floor entry into a category-defining company

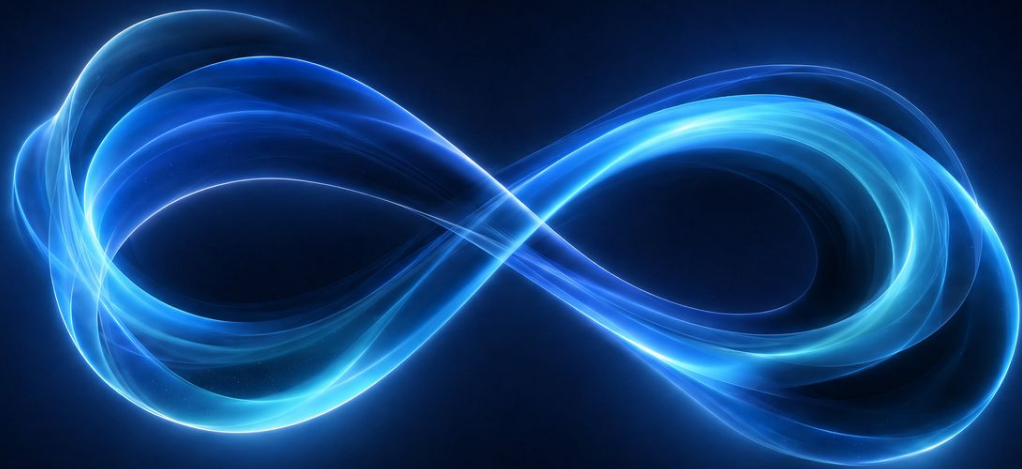

Capital-efficient team with clear milestones

Massive market with winner-take-most dynamics
